Subject: Re: Status of the Remaining Isotech and Rad Data?

Kelley,

Additional reports have been submitted but need scanned into pdfs. We'll see what we can do to move these along. I don't think we have the March results yet but we'll confirm.

Thanks,
Cindy

Hi Fred -

Just following up to see if you have received any additional Rad data? We haven't seen any additional postings.

Per your last update (attached below) - we were waiting for:

- gross alpha/beta results for samples collected between February 9 thru February 15 and March 5 thru March 8
- radium 228 results for samples collected January 30 thru February 15 and samples collected March 5 thru March 8.

Thanks - Kelley

Kelley,

For the Isotech data, only 12 samples were collected between January 23 and 27. These have been posted. No other samples were collected during this first round of sampling. One additional sample was collected on March 5th. Data has not been received yet.

For Rad data, gross alpha and gross beta results have been posted for samples collected between January 23 thru February 3. Radium 228 data has been posted for samples collected between January 23 thru January 28. We are still awaiting gross alpha/beta results for samples collected between February 9 thru February 15 and March 5 thru March 8.

We are still awaiting radium 228 results for samples collected January 30 thru February 15 (lab reported QC issues for these) and samples collected March 5 thru March 8.

We will notify you as soon as these results are received.

Fred

Subject: Status of the Remaining Isotech and Rad Data?

I know that there have been many recent uploads of data to the FTP site. However, I have not seen any additional postings of the Isotech and Rad data.

Sorry to harass you, but.....would you please check on the status of the remaining data?

THANKS!
